CONSULTNET®

ConsultNet: Uniquely Aligned to Meet DOE Requirements

ConsultNet is an information technology (IT) and engineering staffing company that focuses on matching the right people with the right organization. Our niche and extensive network of highly-skilled technical workers aligns directly with the United States Department of Energy's (DOE) vision of tapping into people who specialize in technical, engineering and science fields. Talented people are one of America's most strategic assets in the effort to advance our nation's energy and national security programs. ConsultNet can help you find the right people for the right project.

Meeting U.S. Government Requirements

ConsultNet has 13+ years of experience providing highly educated professionals with specific technical skills to U.S. federal and state governments. Because of this, we are very familiar with DOE requirements, ensuring every candidate we introduce meets basic requirements. Some of our standard services include:

- Verification of U.S. citizenship
- Identifying candidates with proper security clearances
- Conducting background investigations to avoid any potential issues later.

ConsultNet's Services

Our services range from: 1. Our Innovative Flexible and Supplemental Workforce Model; to 2. Contract to Hire; and 3. Full Time Placement.

Highly Skilled Workers, Available on a Project or Temporary Basis

ConsultNet has pioneered the Supplemental and Flexible Workforce concept of applying highly skilled technical workers to the temporary staffing model. When your project ends, so does your contract with our talent. ConsultNet is the ideal staffing solution when hiring a full-time employee is financially or physically impractical.

Contract to Hire

ConsultNet can bring on team members on a contract basis, with an option to hire later. We literally take any potential risk out of new hires because clients take advantage of a try before you buy program.

Dedicated Professionals

Creating Business Success

CONSULTNET[®]

Full Time Placement

ConsultNet has developed strong, sometimes personal relationships with technical workers across the nation that you can tap into. Imagine a staffing firm that doesn't just forward over a resume – but rather a staffing firm that delivers a personal recommendation of candidates, so you can fill your team with confidence.

We focus on building strong, long-term relationships. This relationship-based approach is the key to matching the right people with the right organization and project, quickly and confidently.

Why ConsultNet

Regardless of your staffing needs, ConsultNet is poised to be a partner in helping you achieve your goals. ConsultNet has staff with security clearances. Bottomline, ConsultNet's mission directly aligns with the DOE, and we meet all of the DOE's requirements to provide high-end support of your technical and engineering staffing needs.

ConsultNet Meets DOE Requirements

- We specialize in IT, Engineering & other technical fields
- Experience successfully working with federal and local governments
- Staff with security clearances
- Classified as a Small Business, which can help DOE meet pre-RFP and federal contracting awards percentages for Small Business designations

At ConsultNet, we know that People are the key to success and we promise you access to top-notch talent, an ability to control your budget and a partner in your long-term success.
